ABSTRACT

CapitalEdge – AI-Powered Cloud-Native Banking Management System with Intelligent Credit Scoring, Conversational Banking, DevOps, and MLOps

CapitalEdge is an AI-powered, cloud-native banking management system designed to provide secure, intelligent, and personalized banking services. The system integrates intelligent credit scoring, conversational banking, and automated financial assistance using machine learning and AI. Developed using Agile software engineering practices, the project incorporates DevOps through Git-based workflows, Docker, Kubernetes, and CI/CD automation. DevSecOps practices including code quality analysis, vulnerability scanning, and secure coding are integrated into the development lifecycle. MLOps enables model versioning, deployment, monitoring, and continuous improvement, supported by cloud infrastructure and observability tools such as Prometheus and Grafana.
